SAFETY IV CANNULA (CATHETER)

without wings and without injection port
with automatic activation (spring loaded)

SIZE	18G	20G	22G	24G
------	-----	-----	-----	-----

SAFETY FEATURE : User friendly, Self Activating Safety Mechanism prevents needle stick injuries.

- Passive safety device for protection from needle stick injury.
- Ultra Sharp Needle tip is locked inside a metal clip after use.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Dash back needle.

NEEDLE COVER : Transparent Needle cover to prevent accidental damage to needle and catheter.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 200.

IV CANNULA (CATHETER)

with wings and injection port
with safety feature

SIZE	14G	16G	17G	18G	20G
22G	24G				

SAFETY FEATURE : The metal clip safety is designed to enclose needle sharp tip after the needle is with-drawn hence.

- Passive safety device for protection from needle stick injury.
- Ultra Sharp Needle tip is locked inside a metal clip after use.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Dash back needle.

NEEDLE COVER : Transparent Needle cover to prevent accidental damage.

CERTIFICATION: •CE

PACKING : Box of 100/Master box of 1000.

Advanced Safety for Healthcare Professionals

SAFETY IV CANNULA (CATHETER)

without wings and without injection port
(Slide Safety)

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

ADVANCED SAFETY: Proven track record in reducing accidental needle sticks.

- Needle securely encased completely as the needle is withdrawn.
- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

OPTIONS: Constructed from FEP/PUR/PTFE polymers, Radiopaque catheter.

DESIGN: Equipped with a straight hub for comfortable grip.

- Specialized needle gasket to minimize blood exposure.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

SAFETY IV CANNULA (CATHETER)

with small wings and without injection port
with safety feature

SIZE	18G	20G	22G	24G
------	-----	-----	-----	-----

SAFETY FEATURE : The metal clip safety is designed to enclose needle sharp tip after the needle is with-drawn hence.

- Passive safety device for protection from needle stick injury.
- Ultra Sharp Needle tip is locked inside a metal clip after use.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Dash back needle.

WINGS: Softer small wings for superior patient comfort and enhanced fixation.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

BLOOD CONTROL IV CANNULA

with telescopic safety

SIZE	18G	20G	22G	24G
------	-----	-----	-----	-----

FEATURES: User friendly, Safety Mechanism prevents needle stick injuries.

- Silicon Septum prevents Blood spillage.
- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Dash back needle.

NEEDLE COVER : Transparent Needle cover to prevent accidental damage to needle and catheter.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

stop blood from flowing out without luer attachment

ACTIVE SAFETY IV (CATHETER)

blood control w/o wings and w/o injection port

SIZE	18G	20G	22G	24G
------	-----	-----	-----	-----

FEATURES: User friendly, Self Activating Safety Mechanism prevents needle stick injuries.

- Passive safety device for protection from needle stick injury.
- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Dash back needle.

NEEDLE COVER : Transparent Needle cover to prevent accidental damage.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 200.

stop blood from flowing out without luer attachment

SAFETY IV CANNULA (CATHETER)

with wings and injection port

SIZE	14G	16G	17G	18G	20G
	22G	24G	26G		

FEATURES: The flexible wings provides easy gripping and follows the contours of site allowing more secure fixation.

- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

ULTRA SHARP SILICONISED SS NEEDLE :

Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Flip port cap | Medical paper/Tyvek | Hydrophobic filter | Quick flush back | Sterile/non-pyrogenic/Single use.

CERTIFICATION: •CE

PACKING : Box of 100/Master box of 1000.

SAFETY IV CANNULA (CATHETER)

with wings and injection port

SIZE	18G	20G	22G	24G
------	-----	-----	-----	-----

FEATURES: Passive safety device with proven track record in eliminating of needle stick injuries.

- Needle sharp tip is locked with a non openable metal clip.
- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

OPTION AVAILABLE : FEP/PTFE/PUR/ Catheter | Medical paper/Tyvek | Hydrophobic filter | Quick flush back needle Sterile/non-pyrogenic/Single use.

NEEDLE COVER : Transparent Needle cover to prevent accidental damage.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

Advanced Safety for Healthcare Professionals

SAFETY IV CANNULA (CATHETER)

with wings and injection port

SIZE	14G	16G	17G	18G	20G
	22G	24G	26G		

FEATURES: Passive safety device with proven track record in eliminating of needle stick injuries.

- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

NEEDLE : Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic filter | Quick flush back needle | Sterile/non-pyrogenic/Single use.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

SAFETY IV CANNULA (CATHETER)

with integrated three-way stopcock

SIZE	14G	16G	17G	18G	20G
	22G	24G	26G		

FEATURES: The three-way body provide flexibility to paramedic staff to administer multiple medicine at a time.

- 100% needle tip is checked by AI.

NEEDLE : Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic filter | Packing colour coded M.K.P. | Sterile/non-pyrogenic/Single use.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

IV CANNULA (CATHETER)

with small wings and without injection port

SIZE	24G	26G
------	-----	-----

FEATURES: The flexible wings provide easy gripping and follow the contours of site allowing more secure fixation.

NEEDLE : Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic filter | Quick flush back needle | Thumb Controller | Packing colour coded M.K.P. | Sterile/non-pyrogenic/Single use.

WINGS: Softer small wings for superior patient comfort and enhanced fixation.

CERTIFICATION: •CE

PACKING : Box of 100/Master box of 1000.

PACKING : Box of 100/Master box of 1000.

IV CANNULA (CATHETER)

with small wings and without injection port

SIZE	18G	20G	22G	24G	26G
------	-----	-----	-----	-----	-----

FEATURES: The suturable flexible gauge coloured wings provides easy gripping and follows the contours of site allowing more secure fixation.

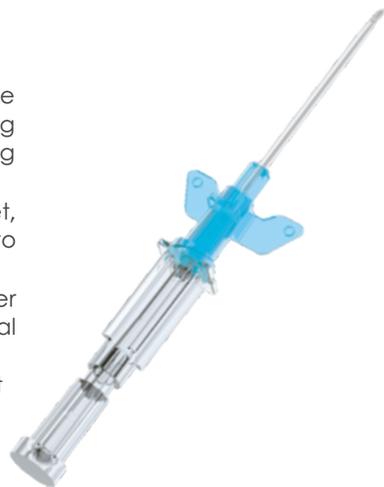

NEEDLE : Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Quick flush back needle | Medical paper/Tyvek | Sterile/non-pyrogenic.

WINGS: Softer small wings for superior patient comfort and enhanced fixation.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

IV CANNULA (CATHETER)

without wings and without injection port

SIZE	14G	16G	17G	18G	20G
	22G	24G	26G		

FEATURES: The flow control hub has hydrophobic filter for allowing air to pass and don't allow blood to ooze out.

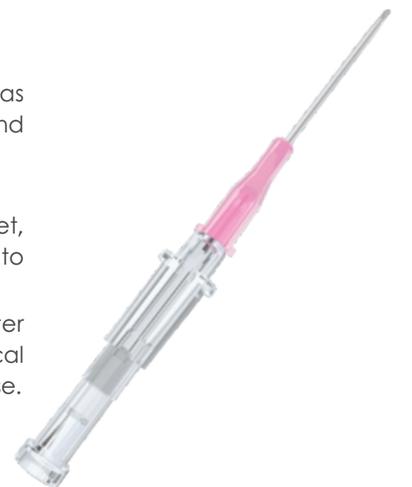

- 100% needle tip is checked by AI.

NEEDLE : Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE : FEP/PTFE/PUR Catheter | Quick flush back needle | Medical paper/Tyvek | Sterile/non-pyrogenic/Single use.

CERTIFICATION: •CE

PACKING : Box of 100/Master box of 1000.

IV CANNULA (CATHETER)

for veterinary use

SIZE	18G	20G	22G	24G

FEATURES: Siliconized, Ultra Sharp, Stainless Steel, back cut Japanese technology needle to perform smooth and traumatic venipuncture.

NEEDLE COVER: Transparent Needle cover to prevent accidental damage to needle and catheter, Different Needle Length Available.

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Hydrophobic Filter | Medical paper/Tyvek/Sterile/non-pyrogenic/ Single use.

CERTIFICATION: •CE

PACKING: Box of 50/Master box of 500.

SAFETY IV CANNULA (CATHETER)

with wings and injection port

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

SAFETY FEATURE: The plastic safety cage is designed to enclose needle sharp tip after the needle is with-drawn hence.

- Passive safety device for protection from needle stick injury.
- Ultra Sharp Needle tip is locked inside a plastic cage after use.

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Flush back needle.

NEEDLE COVER: Transparent Needle cover to prevent accidental damage to needle and catheter.

CERTIFICATION: •CE

PACKING: Box of 100/Master box of 1000.

SAFETY IV CANNULA (CATHETER)

with wings and without injection port

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

SAFETY FEATURE: Ensuring healthcare worker safety with fail-proof needle locking mechanism protecting healthcare workers from accidental, possible fatal stick injury.

- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Flush back needle | Sterile / non-pyrogenic / Single use.

NEEDLE COVER: Transparent Needle cover to prevent accidental damage.

CERTIFICATION: •CE

PACKING: Box of 50/Master box of 500.

SAFETY IV CANNULA (CATHETER)

without wings and injection port

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

SAFETY FEATURE: Ensuring healthcare worker safety with fail-proof needle locking mechanism protecting healthcare workers from accidental, possible fatal stick injury.

- 100% needle tip is checked by AI for ensuring Disposafe's Super Sharpness.

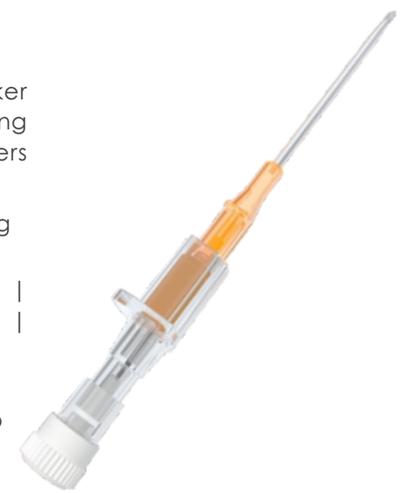

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Flush back needle

Sterile/non-pyrogenic/Single use.

NEEDLE COVER: Transparent Needle cover to prevent accidental damage.

CERTIFICATION: •CE

PACKING: Box of 50/Master box of 500.

PEN TYPE IV CANNULA (CATHETER)

without wings and without injection port

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

FEATURES: Large FB chamber allow quick visualisation for successful venipuncture.

- The Flow control hub has hydrophobic Filter for allowing air to pass and don't allow blood to ooze out.

- 100% needle tip is checked by AI.

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Flush back needle | Packing colour coded M.K.P. | Sterile/non-pyrogenic/Single use.

NEEDLE: Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, needle help clinician to perform easy and painless venipuncture.

CERTIFICATION: •CE

PACKING: Box of 100/Master box of 1000.

IV CANNULA (CATHETER)

without wings and without injection port

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

FEATURES: Large FB chamber allow quick visualisation for successful venipuncture.

- Reduced risk of exposure to the patient's blood.
- Reduced risk of contamination from environmental sources.

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick Flush back needle | Packing colour coded M.K.P. | Sterile/non-pyrogenic/Single use.

NEEDLE: Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, needle help clinician to perform easy and painless venipuncture.

CERTIFICATION: •CE

PACKING: Box of 100/Master box of 1000.

IV CANNULA (CATHETER)

with wings and without injection port

SIZE	14G	16G	17G	18G	20G
22G	24G	26G			

FEATURES: The flexible wings provides easy gripping and follows the contours of site allowing more secure fixation.

- 100% needle tip is checked by AI.

ULTRA SHARP SILICONISED SS NEEDLE:

Siliconized, Ultra Sharp, Multi facet, stainless steel back cut, Helps clinicians to perform easy and painless venipuncture.

OPTION AVAILABLE: FEP/PTFE/PUR Catheter | Medical paper/Tyvek | Hydrophobic Filter | Quick use.

CERTIFICATION: •CE

PACKING: Box of 100/Master box of 1000.

I.V. FIXATION DRESSING

FEATURES: It is used to cover and protect catheter site and to secure devices on top of the skin.

- It saves nursing time as the fixation of I.V. Cannula is very fast and efficient with Fixator.
- Hypo-allergenic can be used on patient with fragile skin also.
- The use of cannula Fixator result in less pain, easy and excellent grip over the I.V. Cannula.
- Available in cotton and PE.

CERTIFICATION: •CE

PACKING: Box of 100/Master box of 1000.

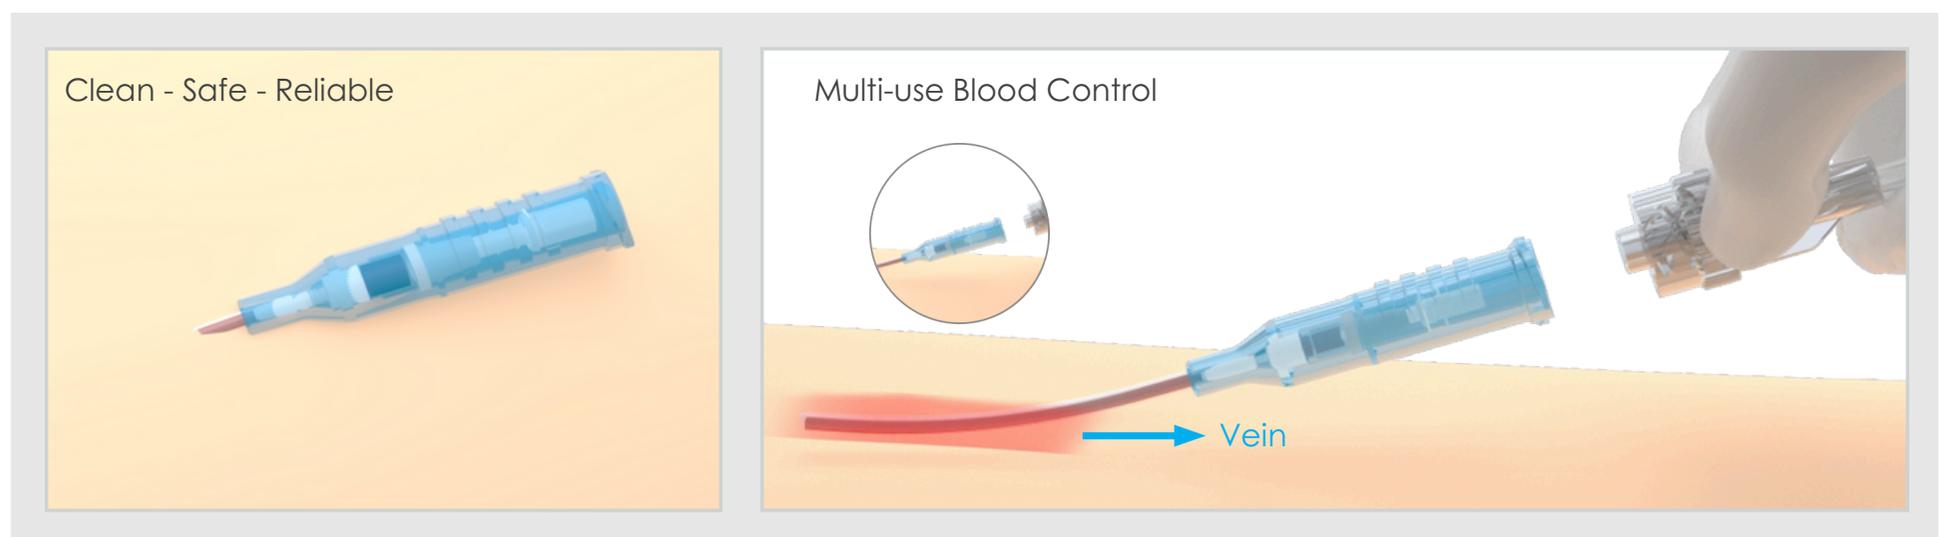

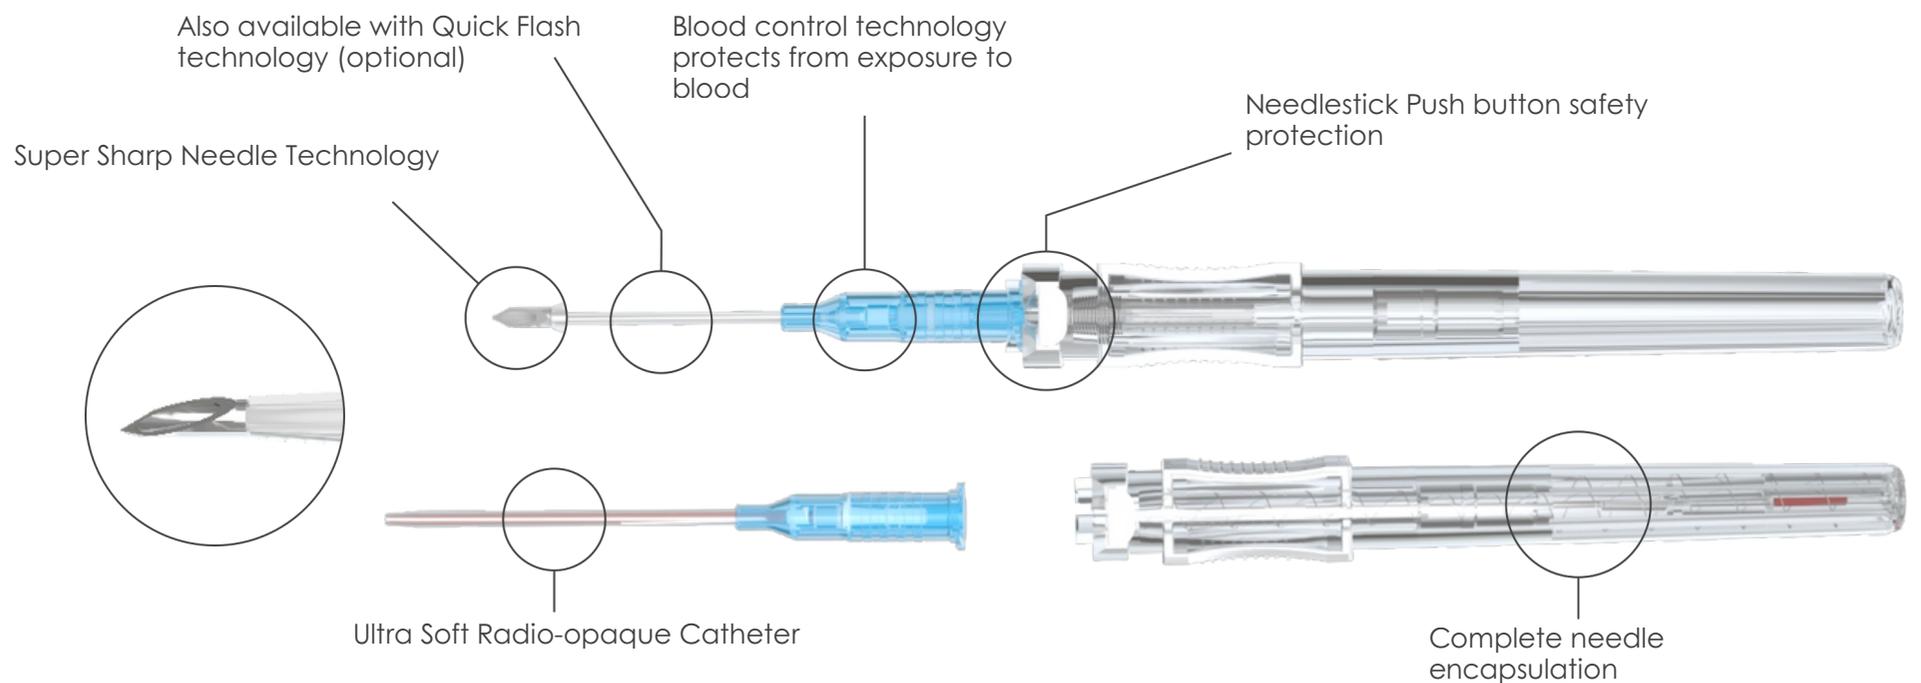

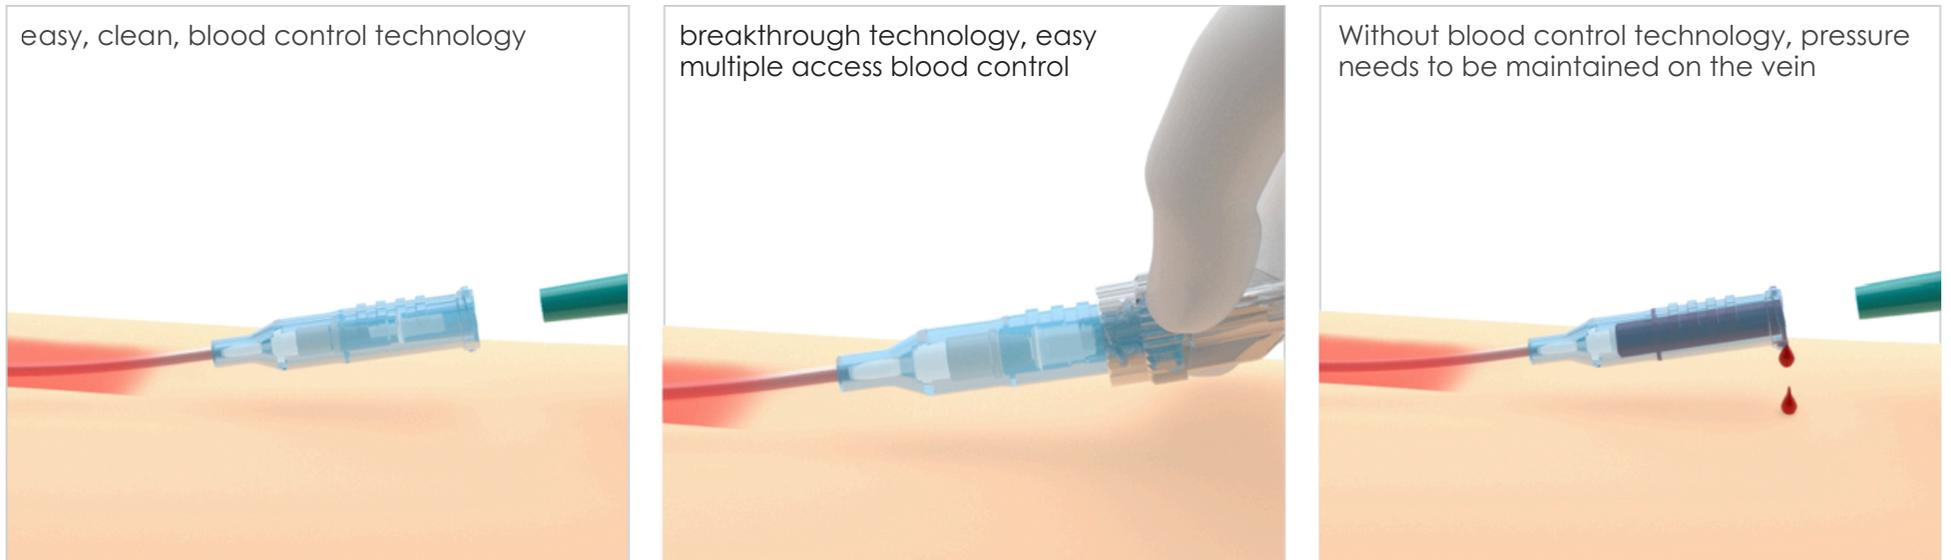

ACTIVE SAFETY IV CANNULA (CATHETER)
WITH BLOOD CONTROL W/O WINGS AND W/O INJECTION PORT
Efficient and Clean Cannulation for Clinicians and Patients

Striving for a clean IV placement each time is essential, but managing pressure while activating safety features and connecting extensions can lead to blood spills.

The DispoSeal+ Active BC Safety IV catheter tackles these challenges:

- Freedom from venous compression during insertion
- Minimised cleanup required and reduced risk for healthcare workers
- Reduced disruption in patient care
- Includes Safety and protection from needle stick injuries
- Multiple access blood control, can be used for blood taking and infusion, with ease and comfort.

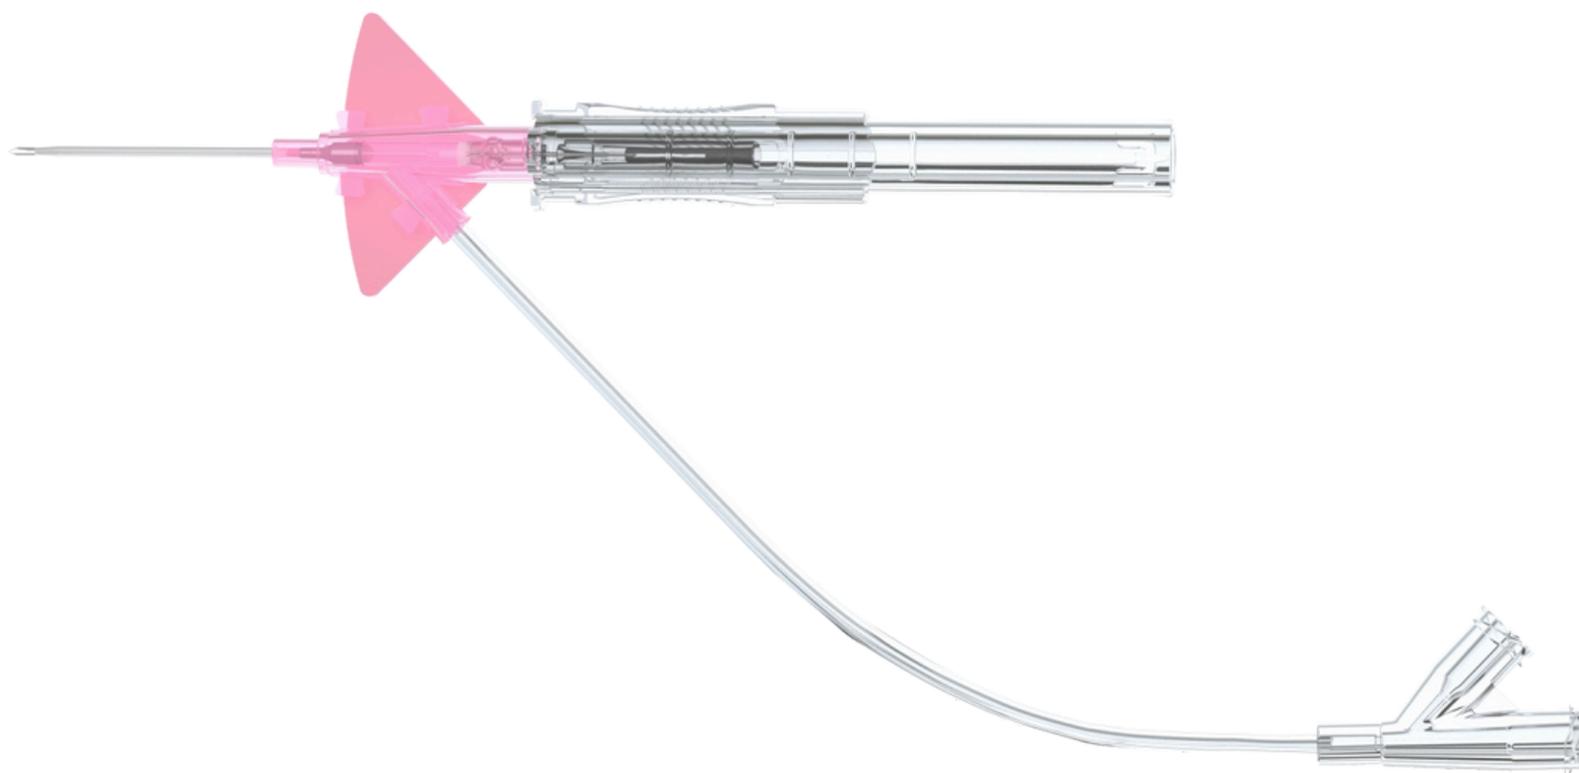

The catheter is meticulously designed to prioritize clinician safety and insertion success, instilling confidence in every procedure and trust from your patients. It has been proven to reduce needlestick injuries. Key features include:

- Active Needle shielding technology for enhanced safety, at a button press.
- Fully encapsulated needle design to minimize exposure.
- Multi-use blood control mechanisms to optimize handling and minimize risks.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 200.

CLOSED IV CANNULA

Closed I.V. Cannula is designed to provide safe, secure, and reliable intravenous access while minimizing the risk of blood exposure and infection. The closed system prevents backflow of blood, reduces the chance of needle-stick injury, and ensures maximum patient safety.

FEATURES:

- Made from biocompatible, kink-resistant PTFE / FEP material.
- Integrated closed system prevents blood leakage.
- Needle with ultra-sharp bevel tip for smooth venipuncture.
- Safety mechanism reduces the risk of accidental needle-stick injuries.
- Transparent flashback chamber for instant venipuncture confirmation.
- Soft, flexible wings for easy fixation and patient comfort.
- Color-coded hub for quick identification of catheter size.
- Sterile, non-pyrogenic, and single-use.

APPLICATIONS: Closed I.V. Cannula is widely used in: • Hospital and Critical Care Units – for safe and continuous IV therapy. • Emergency Medicine & Trauma Care – for rapid fluid resuscitation and blood transfusion. • Oncology – for chemotherapy administration. • Pediatrics & Neonatology – for IV access in small and fragile veins. • General Medicine & Surgery – for routine infusion of fluids, drugs, and nutrition. • Blood Transfusion Units – for safe and efficient blood/blood product transfusion. • ICU & Long-Term IV Therapy – reduces risk of infection and blood exposure.

STERILIZATION:

- Ethylene Oxide (ETO) sterilized.

REGULATORY COMPLIANCE: • CE Marked / ISO Certified • Conforms to international safety and quality standards (ISO-13485 2016).

PACKING : Box of 100/Master box of 1000.

	Size	OD (mm)	Material	Color	Length (mm)	Quantity (Outer BOX)
	14G	2.0mm	PTFE / FEP	Orange	45mm	1000

IV ADMINISTRATION SET

SIZE	NON VENTED	VENTED
------	------------	--------

- FEATURES :** User - Friendly Design with Flexible Drip Chamber
- Standard piercing spike (vented, universal).
 - Easy penetration of solution container and preventing contamination.
 - 15 micron (μm) filter provides high flow rate and protection against large particles.
 - Transparent drip chamber allow for quick & easy visualisation of drip rate.
 - Soft, Kink Resistant, Clear P.V.C. Tubing
 - Standard lumen ID 2.8mm & OD 3.8mm.
 - Standard length 150cm with option of 180cm & bigger length.
 - DEHP Free plasticizer.

CERTIFICATION: •CE •U.S. FDA.

PACKING : Pouch of 25/Master box of 500.

HYPODERMIC NEEDLE

SIZE	18G	19G	20G	21G	22G
23G	24G	25G	26G		

FEATURES: It is used to inject medication or withdrawal of blood for patient care or treatment.

- It is used for Intradermal injection, Subcutaneous injection, Intramuscular injection, Intravenous injection.
- 100% needle tip is checked by AI for ensuring Disposa's Super Sharpness.
- the sharp lancet point tip.

CERTIFICATION: •CE

PACKING : Box of 100/Master box of 10000.

MEASURED VOLUME SET

Burette Set

SIZE	100ML	110ML	150ML
------	-------	-------	-------

FEATURES : Flexible, Transparent & soft Calibrated cylindrical Measured Volume Chamber with Injection port for highly precise IV administration.

- Strong, Sharp air vented spike is made of sturdy medical grade ABS material for easy insertion in I.V. Container.
- Soft and kink resistant tube with latex for easy flushing.

OPTION AVAILABLE : Burette Volume of 150ml/110ml/100ml

- Luer Lock or Luer Slip

CERTIFICATION: •CE

PACKING : Pouch of 25/Master box of 200.

MULTI INFUSION EXTENSION TUBE

SIZE	10CM-100CM	2.8X3.8MM
------	------------	-----------

FEATURES : Soft flexible DEHP Free tube with 15 cm length tube & pinch clamp to replace the use of stop cock.

- Luer locks as per ISO-80369-7 for all Disposables.
- Kink-resistant quality tube.

OPTION AVAILABLE : Needle less Injection site- Microbore tube Two & Three Connecting Extension Lines, Quad, Penta.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

PRESSURE MONITORING

(PM) Extension Line

SIZE	150	200	250
------	-----	-----	-----

FEATURES : It is suitable for pressure monitoring.

- It has small bore for High Pressure (Upto 140psi).
- Made of P.V.C.
- Leak proof male luer lock and female luer lock made according ISO-80369-7 are provided at ends ensure, fitment to all standard medical Equipment and Devices.

OPTION AVAILABLE : DEHP Free P.V.C. tube | Lipid resistant | Tube length 10cm to 250cm | Minimum priming volume | Sterile / Non-Pyrogenic / Single use

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

FLOW REGULATOR SET

FEATURES : The material of flow regulator set is suitable for the use with the drugs.

- DEHP Free tube of ID 2.8mm & OD 3.8mm.
- Designed to control flow rate from 5ml/hr - 250ml/hr manually.
- The flow regulator has ribs for easy gripping and smooth rotation.
- The product can be supplied with I.V. Set for pediatric use.

OPTION AVAILABLE : DEHP Free tube | Needle free "Y" injection site | Male luer lock | Latex free "Y" injection site | Customized tube length available | Rotating Male Luer Lock | Sterile / Non-Pyrogenic / Single use

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

SCALP VEIN SET / BUTTERFLY SET

SIZE	18G	19G	20G	21G	22G
23G	24G				

FEATURES: Soft flexible wings for easy gripping and secure position on the skin cannulation.

- Made of DEHP Free P.V.C.
- Stainless steel needle sharp tip lancet cut needle with high lumen flow.
- Every needle tip is inspected by a high definition electric Vision Camera for its angle/burrs and tip blunt.
- P.V.C. tube is soft, flexible & kink resistance.

CERTIFICATION: •CE

PACKING : Pouch of 250/Master box of 3000.

EXTENSION TUBE

(Low Pressure)

SIZE	10	15	25	50	75
100	150	200	250		

FEATURES: Used to extend the IV fluid pathway and for blood/blood derivatives/nutritive or medicinal fluids transfusion or infusion.

- Flow rate of low pressure extension line is 200ml/min.

OPTION AVAILABLE : DEHP free PVC tube | Lipid resistant | Tube length 10cm to 250cm | Minimum priming volume | Sterile/Non-pyrogenic/Single use.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

IV ADMINISTRATION SET

FEATURES : User - Friendly Design with Flexible Drip Chamber

- Standard piercing spike (vented, universal).
- Easy penetration of solution container and preventing contamination.
- 15 micron (µm) filter provides high flow rate and protection against large particles.
- Transparent drip chamber allow for quick & easy visualisation of drip rate.
- Soft, Kink Resistant, Clear P.V.C. Tubing
- Standard lumen IØ 2.8mm & OØ 3.8mm.
- Standard length 150cm with option of 180cm & bigger length.
- DEHP Free plasticizer.

CERTIFICATION: •CE •U.S. FDA.

PACKING : Pouch of 25/Master box of 500.

SAFE VEIN

BLOOD COLLECTION SET

TUBE LENGTHS: 7" | 12"
NEEDLE SIZES: 21G | 23G | 25G
AVAILABLE: Safety/ Without Safety

OVERVIEW:

A sterile, single-use system engineered for safe and precise venipuncture. The set comes with a pre-attached holder and multi-sample Luer adapter, along with an advanced safety shield that reduces the risk of accidental needlestick injuries. Suitable for both blood sampling and short-duration IV administration.

FEATURES: • Forward-shielding safety cover locks with an audible click, completely enclosing the needle post-procedure. • Simple, single-handed activation without altering technique, ensuring focus on patient care. • Transparent shield provides immediate flashback visibility for successful vein access. • Color-coded wings allow easy size identification and secure grip. • Flexible, kink-resistant tubing ensures reliable blood flow.

Pack Includes: Hypodermic needle, integrated safety shield, color-coded wings, connector, multi-sample Luer adapter, tubing, and pre-attached holder.

APPLICATIONS / USES: VENOUS BLOOD SAMPLING – specially for patients with small or fragile veins (paediatric, geriatric, oncology). MULTIPLE SAMPLE COLLECTION – with vacuum tubes or syringes. SHORT-TERM IV INFUSION of fluids or medications (when direct venipuncture is preferred). DIFFICULT VENIPUNCTURE PROCEDURES – e.g., in dehydrated or obese patients. ARTERIAL BLOOD COLLECTION (in some clinical setups, with appropriate technique). COLLECTION FOR BLOOD CULTURE BOTTLES and other laboratory investigations.

STERILIZATION:

Ethylene Oxide (EO) sterilized

CERTIFICATIONS : CE

PACKING : Box of 50/Master box of 500.

SIZE	10	15	25	50	75
	100	150	200	250	

FEATURES: Three way stop cock at one end and Male Luer Connector at the another end. Universal 6% taper on Luer allow connection with a wide range of Medical Devices.

- 360 degree smooth rotation of tap.
- Arrow mark on tap for indicating flow direction.
- Minimum priming volume.

OPTION AVAILABLE: DEHP free PVC tube | Lipid resistant | Tube length 10cm to 250cm / with 45 degree click rotation.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

THREE WAY STOPCOCK

TAP COLOURS	BLUE	RED
	WHITE	

FEATURES: Three way stopcock is suitable for use during multi channel infusion therapy

- Smooth 360 degree rotation or Dispopclick 45 degree steps.
- Excellent pressure resistance upto 300kpa (45psi).
- Two (2) Female Luer, One (1) Male Luer for secure connection with accessories, as per ISO-80369-7.
- Red and blue pegs for arterial and venous line identification.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

HIGH PRESSURE

(PE) Extension Line

SIZE	75	100	150	250
------	----	-----	-----	-----

FEATURES : PE Extension Line (Straight) It is suitable for Pressure Monitoring and for connection between syringe infusion pump to patient:

- It has small bore for High Pressure (Upto 580psi).
- It is made of inert material so all types of commonly used infusion fluids can be used through this tube.
- Leak proof male luer lock and female luer lock made according ISO-80369-7 are provided at ends to ensure fitment to all standard medical equipment and Devices.

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

TRANSFUSION

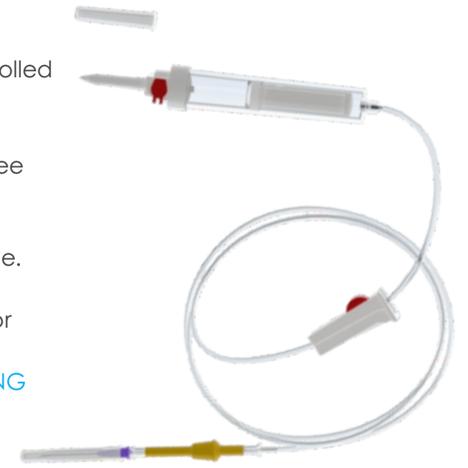

BLOOD TRANSFUSION SET

SIZE	NON VENTED	VENTED
------	------------	--------

FEATURES : For intra vascular, gravity controlled transfusion of blood or blood elements.

- Soft, flexible and transparent drip chamber.
- Soft and kink resistant DEHP free P.V.C. tube.
- For approximately 20 drops/ml.
- With 200 micron blood filter.
- OPTION AVAILABLE :** With or without Needle.
- Luer Lock or Luer slip.
- With airvent spike/without airvent spike.
- Latex Bulb for intermittent medication.
- Single / Double Drip chamber.

CERTIFICATION: •CE **PACKING :** Box of 25/Master box of 500.

RENAL

AV FISTULA NEEDLES

SIZE	14G	15G	16G	17G
------	-----	-----	-----	-----

FEATURES: Ultra thin wall face cut needle. • standard AVF Needle are designed to minimise vessel trauma and optimize blood flow.

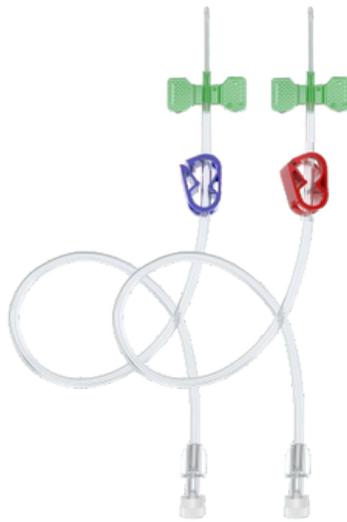

- Safe handling due to rotatable / fixed wings and easy gripping.
- High laminar blood flow.
- Latex free, BPA-Free, DEHP Free.

Option Available : Available in single pack or twin pack

- Connector clamp available in White / Red / Blue Colour

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

HEMODIALYSIS CATHETERS KIT

FEATURES: Colour coded luer for easy identification of artery & venous infusion lines.

- Available with single, double & triple lumen extensions for neonate & Adults.
- Made of Polyurethane material which provides strength during insertion.
- Radio-opaque catheter with clear, definite marking to ensure correct placement of catheter under X-ray.
- Soft tip designed to resist positional occlusion and reduces trauma.

PACKING : Box of 1/Master box of 10.

HEMODIALYSIS BLOOD LINE

SIZE	PRE PUMP/POST PUMP
------	--------------------

FEATURES : High and reliable Quality, ensuring patient safety :

- Certified quality systems for development and production.
- Perfect compatibility to machine interfaces
- Assuring highest safety and performance with most machines.
- Pump tube with high elasticity P.V.C. Material for long terms use.
- Exclusive use of plasticizers with high hemo-compatibility and negligible cytotoxic reactions.

CERTIFICATION: •CE

PACKING : Master box of 40.

UROLOGY

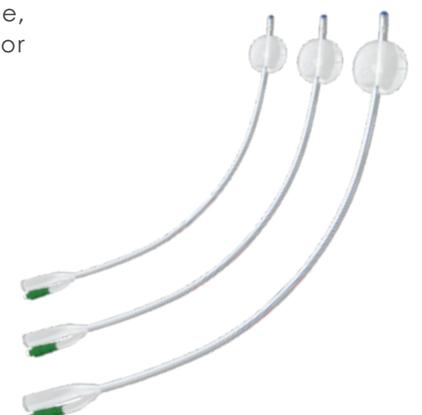

FOLEY BALLOON CATHETER (100% SILICONE)

FOLEY CATHETER Made of 100% silicone, transparent color Catheter for postoperative drainage, 2 & 3-way.

- Color coded sleeve for identify difference sizes.
- Luer lock valves fits all type of syringe.
- Blue line radiopaque line know the foley position during x- ray, Catheter length approx. 40 cm.
- Sterile, single-use, Latex free.
- Soft and flexible foleys gives maximum patient comfort

CERTIFICATION: •CE

PACKING : Box of 20/Master box of 500.

SURGERY

SURGICAL BLADE

Stainless steel & carbon steel blades

SIZE	FITMENT -3	FITMENT -4
------	------------	------------

FEATURES: Carbon Steel {as per BS 2982:1992}

- Super sharp Blades.
- Stainless Steel [Grade F as per ISO 7153:2016]
- Complies the fitment requirement of ISO 7740:1985
- Packed peel Open Al foil pouches with a VCI protective inner line.
- Shelf life of 5 Years.
- Sterilized by Gamma Radiation.

CERTIFICATION: •CE •U.S. FDA.

PACKING: Box of 100/Master box of 10000.

DISPOSABLE SCALPEL

SIZE	FITMENT -3	FITMENT -4	THUMB SCALPEL
------	------------	------------	---------------

FEATURES: Stainless Steel Surgical Blade is mounted on ABS plastic handle Protected with Guard.

- Disposable Scalpel handle are ergonomically designed which gives, better grip, safe usage and better handling.
- Handle is provided with fluted finger grip for better grip.
- Individually packed is a Soft Blister.
- Sterile Gamma Radiation/EO.
- We also offer bulk pack Non-Sterile for Kits-Pack.

CERTIFICATION: •CE •U.S. FDA.

PACKING: Box of 10/Master box of 1000.

SAFETY SCALPELS

(Sheath Safety Scalpel)

SIZE	10	10A	11	11P	12
12D	13	15	15B	15D	

FEATURES: Sheath Safety Scalpel made of ABS

- Plastic handle fitted with Stainless Steel blades, allow Surgeons to have full view of Incision sight while performing Surgery as Blade is fully exposed in open position.
- Easy and smooth movement allow Surgeons to use with ease in conducting procedure.
- Available in both fitment handle slot size 3 & 4 and all the sizes of Blades in SS.

CERTIFICATION: •CE •U.S. FDA.

PACKING: Box of 100/Master box of 500.

BIOPSY PUNCH

SIZE	1.0MM	1.5MM	2.0MM	2.5MM	3.0MM
3.5MM	4.0MM	5.0MM	6.0MM	7.0MM	8.0MM

FEATURES: Punches made of High Quality Steel which are super grounded with Inthera Pharma's sharp technology.

- Smooth large ribbed handle allow secure grip and large round head allows thumb control while performing procedure. Ready to use Sterile Blister Pack.

sharp punches perform very effectively while using on skin without any skin trauma.

CERTIFICATION: •CE •U.S. FDA.

PACKING: Box of 10/Master box of 500.

STITCH CUTTER

FEATURES: Stitch Cutter's are ideal choice of blade for removing all suture stitches without creating any damage to freshly healed wound closure.

- Stitch Cutter are produced in three different sizes Long, Standard/Short and Mini in CS and SS.

- Stitch Cutter are designed with special Blunt Tip ensuring no damage to freshly healed wounds.

CERTIFICATION: •CE •U.S. FDA.

PACKING: Box of 100/Master box of 1000.

RETRACTABLE SAFETY SCALPELS

(Slide Safety Scalpel)

SIZE	10	10A	11	11P	12
12D	13	15	15B	15D	

FEATURES: Inthera Pharma Retractable Safety Scalpel made of ABS

- Plastic handle fitted with SS blades, allow Surgeons to have full view of Incision sight while performing Surgery as Blade is fully exposed in open position.

- Easy and smooth movement allow Surgeons to use with ease in conducting procedure.
- Available in both fitment handle slot size 3 & 4 and all the sizes of Blades in SS.

CERTIFICATION: •CE •U.S. FDA.

PACKING: Box of 10/Master box of 500.

DERMAL CURETTE

SIZE	2.0MM	3.0MM	4.0MM	5.0MM	7.0MM
------	-------	-------	-------	-------	-------

FEATURES: Curette are made of stainless sharp cutting edge allow proper curetting.

- Dermal Curette is essential device in Dermatology, Gynaecology, Plastic Surgery for Curettage is Soft Weak tissue & Removal of small Glands.

- Inthera Pharma's Super Sharp Technology. **CERTIFICATION:** •CE •U.S. FDA. **PACKING:** Box of 10/Master box of 500.

WOUND DRAINAGE SET

SIZE	6FG	8FG	10FG	12FG	14FG
16FG	18FG				

FEATURES: Suitable for close wound drainage under negative pressure post operatively.

- Can be used with one or two catheters simultaneously.
- Graduated Bellow Chamber.
- Radio opaque draining catheter has multiple, very strong perforation for optimum drainage end of the perforated catheter is tip formed

to minimize the trauma to patient.

CERTIFICATION: •CE

PACKING: Box of 1/Master box of 20.

SAFE EDGE

PREP RAZOR

OVERVIEW:

A disposable clinical razor designed for clean, efficient skin preparation. Precision-crafted with a German stainless-steel blade, platinum edge, and Teƒon coating for maximum sharpness, comfort, and reduced skin irritation.

FEATURES:

- Premium German stainless-steel blade for reliable performance.
- Platinum-honed edge ensures durability and a smooth cut.
- Teƒon coating provides friction-less movement across the skin.
- Wide blade design reduces the number of strokes required.
- Protective guard minimizes nicks, cuts, and irritation.
- Ergonomically designed handle for controlled grip.

CERTIFICATIONS : CE

PACKING : Box of 100/Master box of 1000.

GOUGE BLADE

A precision surgical blade designed for controlled tissue removal, shaping, or debulking during delicate surgical procedures. Made from high-grade stainless steel with a sharp, concave cutting edge for smooth, accurate performance.

FEATURES:

- Available in straight, curved, and spoon shapes
- Razor-sharp, honed cutting edge for clean incisions
- Sterile, single-use (or re-usable – specify as per product)
- Ergonomically designed handle compatibility for better grip and control
- Manufactured from high quality stainless steel and carbon steel for durability and sharpness.

APPLICATIONS:

- Plastic & reconstructive surgery
- Orthopaedic procedures (bone/cartilage shaping)
- ENT, ophthalmic, podiatry & dental surgeries

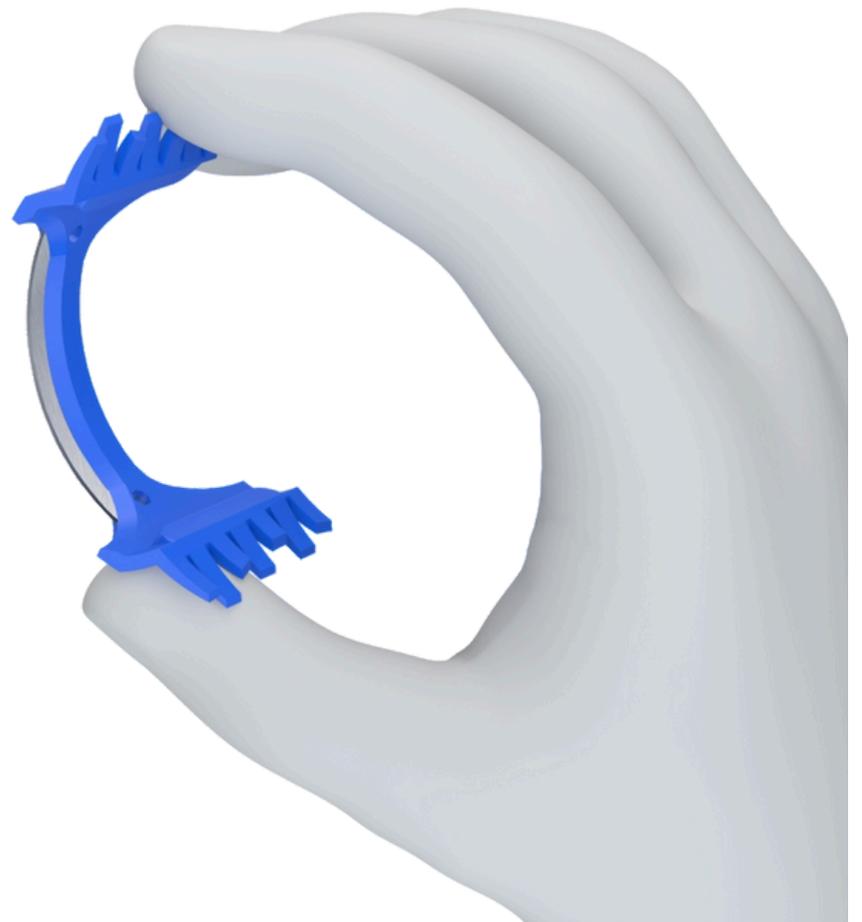

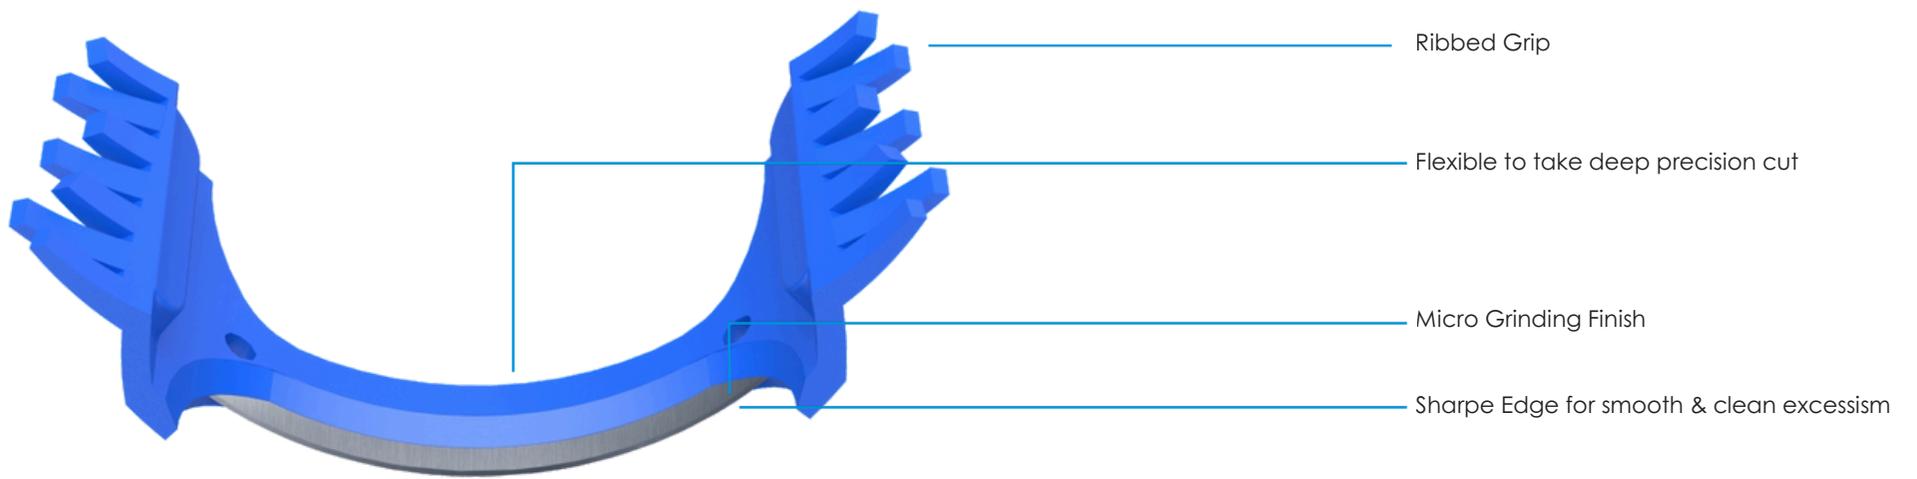

AVAILABLE SIZES:

- 1,2,3,4,5,6,8,10,12,15

CERTIFICATIONS : CE

PACKING : Box of 50/Master box of 500.

DERMAL BIOPSY BLADE

Dermal Biopsy Blades are precision-engineered, sterile, and ready-to-use surgical instruments designed for obtaining uniform and consistent skin tissue samples. These blades ensure minimal tissue distortion, providing reliable samples for histopathological analysis.

FEATURES:

- Made from high-quality stainless steel for durability and sharpness.
- Sterile, individually packed for single use.
- Ergonomically designed for precise cutting.
- Provides smooth, circular incisions with minimal trauma.
- Ensures accurate and consistent biopsy specimens.

APPLICATIONS:

- Dermatology (skin lesion biopsy)
- Histopathology sampling
- Cancer screening and diagnosis
- Research and clinical use

STERILIZATION:

- Gamma Irradiation.

REGULATORY COMPLIANCE:

- CE Marked / ISO Certified
- Conforms to international medical standards (ISO-13485 2016).

PACKING : Box of 50/Master box of 200.

MUCUS EXTRACTOR

SIZE	6FG	8FG	10FG	12FG	14FG
------	-----	-----	------	------	------

FEATURES: Mucus extractor is used for aspiration of secretion from oropharynx in infants to ensure free respiration.

- Funnel shaped adapter at the proximal end of suction tube to ensure easy & secured connection.
- Graduated & transparent chamber allows correct measurement & visual checking of aspirate.
- Soft, frosted & kink resistant PVC tubing.
- Spare cap is provided for safe storage of specimen for analytical testing & safe disposal.

CERTIFICATION: •CE

PACKING : Box of 25/Master box of 250.

YANKAUER SUCTION SET

TUBE LENGTH	250CM	300CM
-------------	-------	-------

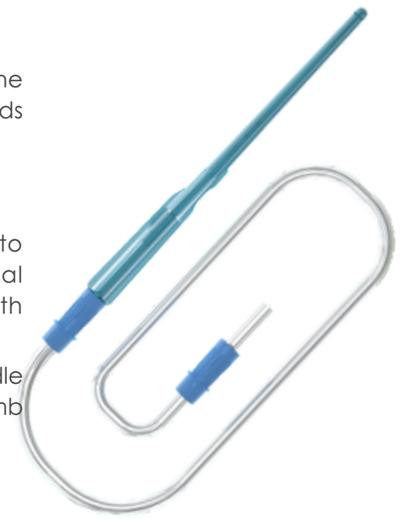

FEATURES: Yankauer suction set is used for the removal of secretion, blood & body fluids during surgery.

- Large lumen in handle provide rapid aspiration & resist clogging.
- Available with universal connectors to connect with suction pump line at proximal end and distal end to be connected with Yankauer Handle.
- Rigid transparent / translucent suction handle with Crown / Plain tip with or without thumb control.

• Sterile / Non-Pyrogenic / Single use.

CERTIFICATION: •CE

PACKING : Box of 10/Master box of 60.

LATEX SURGICAL GLOVES

SIZE	5.5	6.0	6.5	7.0	7.5
	8.0	8.5	9.0	9.5	

FEATURES: Sterile Surgical Gloves are made of Natural Latex / Rubber

- Powder / Powder Free Available as per buyers requirement.
- Sterile / Non-Pyrogenic / Single use.

OPTION AVAILABLE : Tear open pouch / peel open pouch

CERTIFICATION: •CE

PACKING : Box of 50/Master box of 500.

UMBILICAL CORD CLAMP

SIZE	GREEN	BLUE	WHITE
------	-------	------	-------

FEATURES: Designed for clamping Umbilical Cord immediately after birth of baby.

- Clamp helps stop bleeding from the blood vessels of the umbilical cord.
- Designed with Non-Reopenable locks to avoid any accidental opening of clamp.
- Designed with secure and leak proof jaws to ensure proper clamping.

OPTION AVAILABLE : Blue, White, Green

CERTIFICATION: •CE •U.S. FDA.

PACKING : Box of 100/Master box of 1000.

UROLOGY

T.U.R IRRIGATION TUBE

SIZE	SINGLE	DOUBLE
------	--------	--------

Flexible, Kink-Resistant Tubing: Designed with high-quality, medical-grade materials to prevent kinks, ensuring a continuous, steady flow during irrigation procedures.

Precision Flow Control: Equipped with an adjustable flow regulator that allows healthcare providers to control irrigation rates with accuracy, tailored to the needs of each procedure.

Clear, Transparent Tubing: Made from crystal-clear material for easy monitoring of fluids, helping to detect blockages, air bubbles, or contamination quickly.

PACKING : Box of 10/Master box of 100.

NELATON CATHETER

SIZE	6FG	8FG	10FG	12FG	14FG
	16FG	18FG			

FEATURES: DEHP free P.V.C. tube is used.

- Nelaton Catheter surface is clear / frosted smooth.
- The distal end is coned for atraumatic catheterization.
- Two lateral eyes allow for efficient drainage.
- Universal, Gauge colour coded funnel shaped connector provide for easy connection to urine bag.
- The complete length of the catheter is 400mm and effective length is 370mm
- Sterile/ Non-Pyrogenic /Single use.

PACKING : Box of 50/Master box of 500.

URINE COLLECTION BAG

SIZE	URINE BAG STD.
------	----------------

FEATURES: Made of Medical grade Non-toxic, bio-compatible P.V.C. sheets.

- Two layered laminated P.V.C. sheet to avoid any leakage / seepage.
- Designed outlet connector to make closed connection with Foley's Catheter
- Non return valve & drainage outlet Top & Bottom.
- Printed with easily readable scale and other necessary details.
- Tube length Approx 100cm long tube.
- Capacity 2000 ml.

CERTIFICATION: •CE •U.S. FDA.

PACKING : Master box of 30.

URIMETER

SIZE	URINE BAG STD.
------	----------------

FEATURES: The urimeter is directly attached to two liters capacity urine bag with overflow facility.

- The completely closed circuit eliminates the risk of contamination
- The universal tapered connector facilitates aseptic catheter and urine bag connection.
 - Made of medical grade Non - Toxic, Bio-Compatible P.V.C. sheets.
- Two layer laminated P.V.C. sheet to avoid any leakage / seepage.

CERTIFICATION: •CE •U.S. FDA.

PACKING : Box of 25/Master box of 100.

RESPIRATORY

OXYGEN FACE MASK

SIZE	SMALL	MEDIUM	LARGE
------	-------	--------	-------

- FEATURES:** Swivel Connector for patient comfort.
- 200cm long start lumen kink resistant tube.
 - Non Sterile / Sterile mask is made in class 10k clean room.
 - Oxygen mask made from DEHP FREE P.V.C. Material
 - Oxygen mask is designed in such a way that face mask fits comfortably over face.
 - Elastic strap provided to position the mask properly.
 - Soft connector of funnel shape provided for easy connection to oxygen source.

CERTIFICATION: •CE •U.S. FDA.

PACKING : Box of 25/Master box of 100.

NEBULIZER FACE MASK

SIZE	SMALL	MEDIUM	LARGE
------	-------	--------	-------

- FEATURES:** Swivel Connector for patient comfort.
- 200cm long star lumen kink resistant tube.
 - Non Sterile / Sterile mask is made in class 10k clean room.
 - Nebulizer mask made from DEHP FREE P.V.C. Material
 - Nebulizer mask is designed in such a way that face mask fits comfortably over face.
 - Elastic strap provided to position the mask properly.
 - Soft connector of funnel shape provided for easy connection to oxygen source.

CERTIFICATION: •CE

PACKING : Box of 25/Master box of 100.

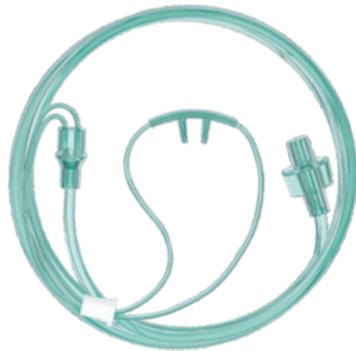

NASAL OXYGEN CANNULA

SIZE	SMALL	MEDIUM	LARGE
------	-------	--------	-------

- FEATURES:** Used for easy & efficient administration of oxygen.
- Star lumen tube ensure the supply of oxygen even if tube is accidentally kinked.
 - Soft twin prong nasal tip to ensure equal volume of oxygen to both air passages.
 - Soft and kink resistant P.V.C. Tube.
 - Soft funnel sharp connector facilitates easy connection to the oxygen source.
 - Available with DEHP Free tube.
 - Tube Length 200cm.

CERTIFICATION: •CE

PACKING : Box of 25/Master box of 200.

NEBULIZER MACHINE (HANDY)

- FEATURES:** Compressor based Nebulizer Machine which uses compressed air to deliver medications in the form of aerosol, a fine mist that can be inhaled.
- Safe-Neb allows the medication to go directly to patient airways and lungs. The medication can be given over a long period of time.

CERTIFICATION: •U.S. FDA.

PACKING : Box of 1/Master box of 6.

NEBULIZER MACHINE (MINI)

- FEATURES:** Compressor based Nebulizer Machine which uses compressed air to deliver medications in the form of aerosol, a fine mist that can be inhaled.

- Safe-Neb allows the medication to go directly to patient airways and lungs. The medication can be given over a long period of time.

CERTIFICATION: •U.S. FDA.

PACKING : Box of 1/Master box of 6.

CERTIFICATION: •CE

NEBULIZER MACHINE (PANDA)

- FEATURES:** Compressor based Nebulizer Machine which uses compressed air to deliver medications in the form of aerosol, a fine mist that can be inhaled.

- Safe-Neb allows the medication to go directly to patient airways and lungs. The medication can be given over a long period of time.

CERTIFICATION: •U.S. FDA.

PACKING : Box of 1/Master box of 6.

NEBULIZER MACHINE (PUPPY)

- FEATURES:** Compressor based Nebulizer Machine which uses compressed air to deliver medications in the form of aerosol, a fine mist that can be inhaled.

- Safe-Neb allows the medication to go directly to patient airways and lungs. The medication can be given over a long period of time.

CERTIFICATION: •U.S. FDA.

PACKING : Box of 1/Master box of 6.

NEBULIZER MACHINE

- FEATURES:** Compressor based Nebulizer Machine which uses compressed air to deliver medications in the form of aerosol, a fine mist that can be inhaled.

- Safe-Neb allows the medication to go directly to patient airways and lungs. The medication can be given over a long period of time.

CERTIFICATION: •U.S. FDA.

PACKING : Box of 1/Master box of 6.

GUEDEL AIRWAY

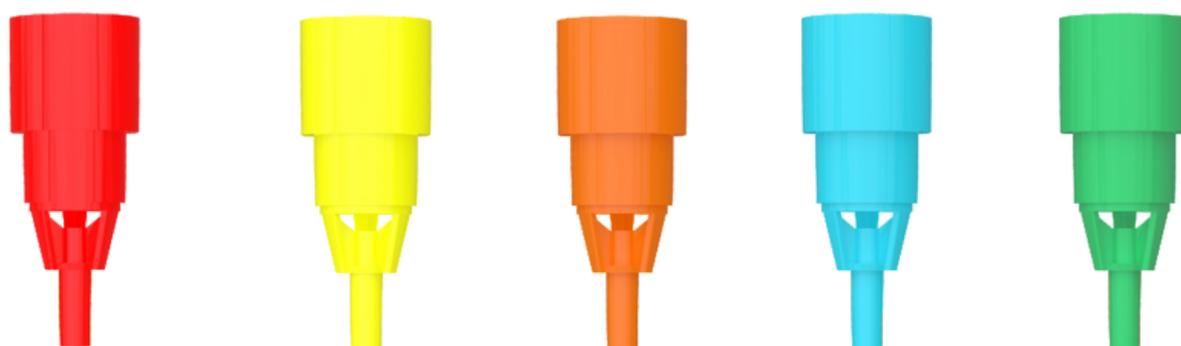

- SIZES (COLOR-CODED):**
- Newborn – 4 cm (Pink)
 - Infant – 5 cm (Blue)
 - Small Child – 6 cm (Black)
 - Child – 7 cm (White)
 - Small Adult – 8 cm (Green)
 - Medium Adult – 9 cm (Yellow)
 - Large Adult – 10 cm (Red)
 - X-Large Adult – 11 cm (Orange)

OVERVIEW:
 High-quality polypropylene airway designed with patient safety and comfort in mind. The color-coded system enables quick and accurate selection, while the contoured profile ensures a secure airway during clinical procedures.

- FEATURES:**
- Rounded, atraumatic edges minimize tissue irritation.
 - Built-in bite block prevents occlusion and protects the device.
 - Anatomical curvature facilitates smooth and accurate placement.

CERTIFICATIONS : CE
PACKING : Box of 10/Master box of 100.

VENTURI MASK SET

SIZES: Pediatric | Adult

OVERVIEW:
 A precision oxygen delivery system designed to provide consistent and controlled oxygen concentrations. The variable valve system allows clinicians to customize therapy according to patient needs.

- FEATURES:**
- Crush-resistant star-lumen tubing ensures uninterrupted oxygen flow.
 - Six color-coded valves deliver fixed oxygen concentrations: 24% (2L/min) | 28% (4L/min) | 31% (6L/min) | 35% (8L/min) | 40% (10L/min) | 60% (15L/min)
 - Humidification cup included for enhanced patient comfort.
 - Built to meet global safety and performance standards.
 - Lightweight, easy-to-assemble design for clinical convenience.

Each Set Contains: Pediatric or adult aerosol mask, star lumen oxygen tubing, connector tube, and six precision Venturi valves.

CERTIFICATIONS : CE
PACKING : Box of 25/Master box of 100.

TRACHEOSTOMY TUBE

Tracheostomy Tubes are designed to establish and maintain an airway in patients requiring long-term ventilation or airway management. Manufactured from medical-grade materials, the tube ensures patient comfort, secure placement, and reliable performance. Available with cuffed, uncuffed, fenestrated, and non-fenestrated variants.

- Establishing and maintaining a patent airway: This is the primary function, ensuring air can reach the lungs.
- Facilitating mechanical ventilation: Tracheostomy tubes are often used for patients who require long-term breathing support from a ventilator.
- Removing secretions from the lungs: The tube allows for suctioning of mucus and other fluids from the airway.
- Bypassing upper airway obstruction: Conditions like swelling, tumors, or trauma in the neck or face can obstruct the airway, making a tracheostomy necessary.
- Managing secretions in patients with neuromuscular conditions: Conditions like ALS can weaken the muscles needed for breathing and coughing, requiring a tracheostomy for airway clearance.

FEATURES:

- Made from medical-grade, non-toxic PVC / silicone.
- Soft, rounded, atraumatic tip for patient comfort.
- Available in cuffed & uncuffed options.
- Low-pressure, high-volume cuff ensures effective sealing and minimizes tracheal trauma.
- Clear, transparent tube for easy secretion monitoring.
- Radio-opaque line for X-ray visualization.
- Smooth 15 mm connector for ventilator and anesthesia circuit compatibility.
- Flange designed for secure fixation and comfort.
- Sterile, single-use, non-pyrogenic.

AVAILABLE TYPES:

- Cuffed Tracheostomy Tube
- Uncuffed Tracheostomy Tube
- Fenestrated Tracheostomy Tube
- Non-fenestrated Tracheostomy Tube

AVAILABLE SIZES (ID IN MM):

- Pediatric: 3.0 mm, 3.5 mm, 4.0 mm, 4.5 mm, 5.0 mm, 5.5 mm
- Adult: 6.0 mm, 6.5 mm, 7.0 mm, 7.5 mm, 8.0 mm, 8.5 mm, 9.0 mm, 9.5 mm, 10.0 mm

APPLICATIONS:

- Airway management in critical care & ICU.
- Patients requiring prolonged mechanical ventilation.
- Bypassing upper airway obstruction.
- Post head & neck surgery airway management.
- Facilitating suction of tracheobronchial secretions.
- Emergency airway access in trauma or obstructive conditions.

STERILIZATION:

- Ethylene Oxide (ETO) sterilized.

REGULATORY COMPLIANCE:

- CE Marked / ISO Certified
- Conforms to international safety and quality standards (ISO-13485 2016).

PACKING : Box of 1/Master box of 10.

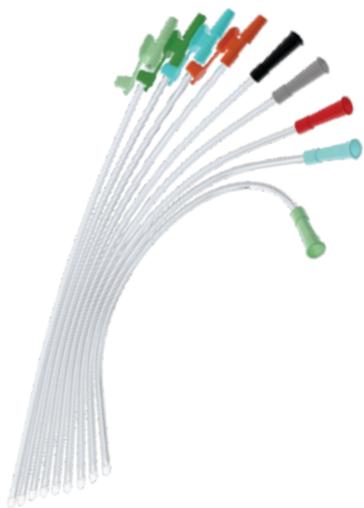

SUCTION CATHETER

SIZE	8FG	10FG	12FG	14FG	16FG
	18FG	20FG			

FEATURES: Suction Catheter is a long flexible tube which is used in intensive care to remove secretion from the mouth and airway of critical patients. This Catheter is attached to a collection container and device that generates suction.

- Manufactured from Non-Toxic, DEHP Free P.V.C. tube.
- Universal colour coded connector for size identification and secure connection with suction connector.

CERTIFICATION: •CE

LUNG EXERCISER

FEATURES: Three flow rate 600 ml/sec, 900 ml/sec, and 1200 ml/sec are identified by three different colour balls.

- E.V.A. connecting tube is very flexible for easy maneuvering.
- P.P. Dash free rounded surface mouth piece is for user comfort.
- Lung exerciser is to be used post covid and cardiac surgery on recommendation of surgeon / paramedic staff.
- By using lung exerciser can help to open your airway and prevent fluid or mucus from accumulating in your lungs.

CERTIFICATION: •CE

PACKING : Box of 1/Master box of 40.

ENDOTRACHEAL TUBE

cuffed / plain

			SIZE	2.0MM	2.5MM	3.0MM
3.5MM	4.0MM	4.5MM	5.0MM	5.5MM	6.0MM	6.5MM
7.0MM	7.5MM	8.0MM	8.5MM	9.0MM	9.5MM	10.0MM

FEATURES : Used to protect airway under general anesthesia congenital malformation and disease of the upper airways, mechanical ventilation, perinatal resuscitation and various form of respiratory disorder.

- Made from non-toxic, non-irritant medical grade clear P.V.C.
- Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature.

CERTIFICATION: •CE

PACKING : Box of 25/Master box of 200.

GASTROENTEROLOGY

INFANT FEEDING TUBE

SIZE	4FG	5FG	6FG	8FG	10FG
------	-----	-----	-----	-----	------

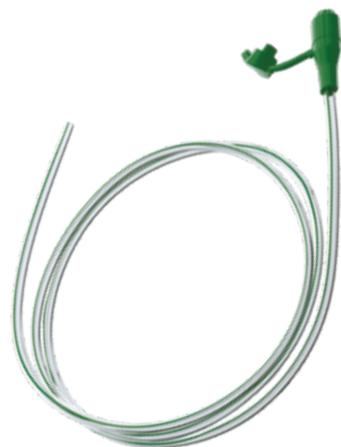

FEATURES: For neonatal and paediatric nutritional feeding.

- DEHP Free tube with graduation mark after every cm.
- Atraumatic, Soft rounded, closed tip with lateral eyes for efficient aspiration & administration.
- X-Ray opaque line provided through out the length of tube.

OPTION AVAILABLE : Tube length 40cm, 50cm & 100cm

CERTIFICATION: •CE

PACKING : Box of 100/Master box of 600.

RYLE'S TUBE / NASOGASTRIC TUBE

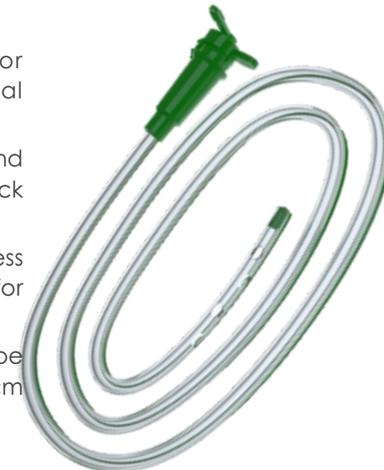

SIZE	6FG	8G	10G	12G	14G
	16G	18G	20G		

FEATURES: Nasogastric Feeding tube for introduction and aspiration of intestinal secretion.

- It has four lateral eyes to avoid blockage and easy flushing help to release any formula stuck to the inside of the tube.
- The distal end is closed by a special process to avoid any point and have marking for accurate placement.
- Soft, frosted and kink resistant P.V.C. tube radio-opaque line marked at 50, 60 & 70 cm from the tip for accurate placement.

CERTIFICATION: •CE

PACKING : Box of 25/Master box of 500.

ANESTHESIA

SPINAL NEEDLE

SIZE	16G	18G	19G	20G	21G
	22G	23G	25G	26G	27G

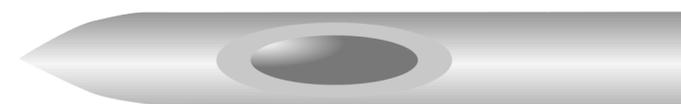

FEATURES: Suitable for Spinal anaesthesia, High flow rate enables faster cerebro spinal fluid flush back.

- Quincke point for smoother penetration.
- Colour coded hub for easy identification.
- Sterilization by Ethylene Oxide.

PACKING : Box of 25/Master box of 1000.

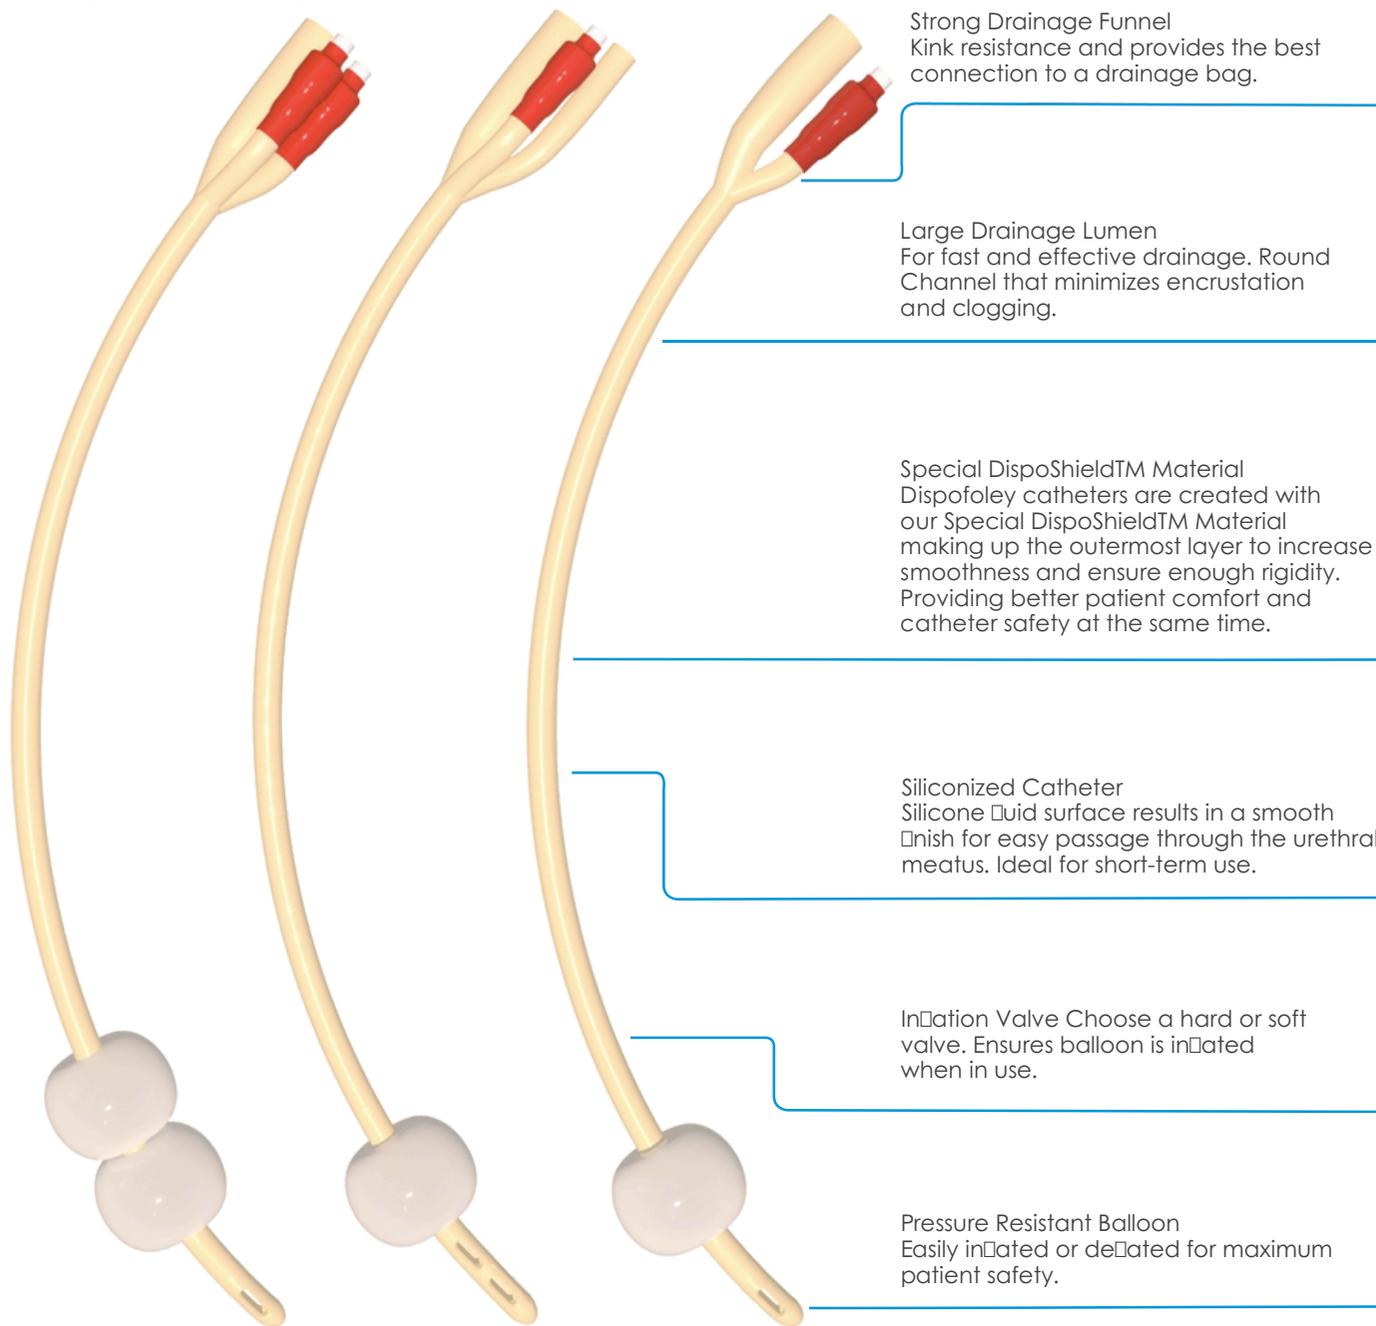

Quincke Needle

Pencil Point Needle

2 WAY, 3 WAY & DOUBLE BALLOON
FOLEY BALLOON CATHETER

(UROLOGY)

Strong Drainage Funnel
Kink resistant and provides a secure connection to a drainage bag.

Reinforced Catheter Shaft
Prevents collapse and for effective suctioning.

Inflation Valve Choice of hard or soft valve. Ensures the balloon is inflated when in use. ISO-80369 Compliant Luer

Double Balloon
Extra inflatable balloon on the shaft, located a short distance from the tip.

1- Drainage Channel 2- Irrigation Channel 3- Balloon Inflation Channel

combines comfort, durability, and smarter flow tech for reliable short-term urinary drainage. Backed by CE & ISO certification, we deliver clinically trusted latex Foley catheters with a modern edge — built for distributors, designed for hospitals, preferred by patients.

Why Flaxen?

The signature Flaxen hue is more than a fresh look:

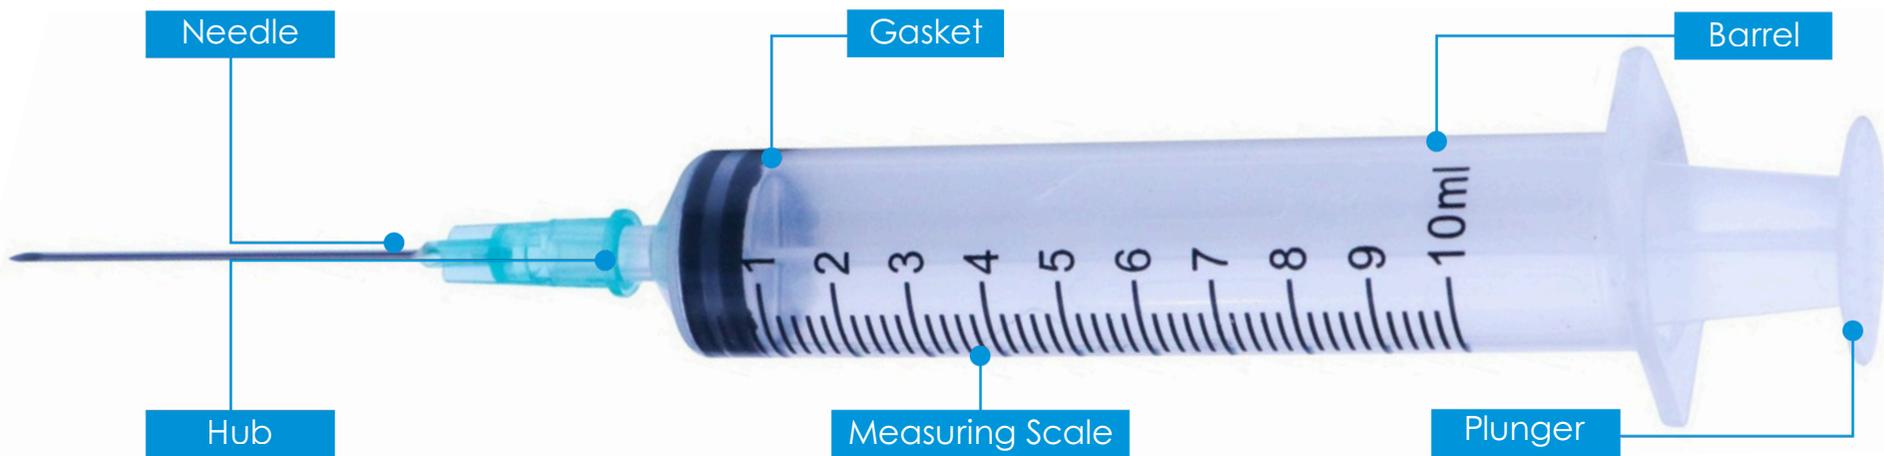

- Quality Check-Ready: Reveals impurities better than amber latex
- Clean Visual Appeal: Preferred in hospital settings for its bright, hygienic tone
- Premium Perception: Looks and feels modern to healthcare professionals

DISPOSABLE SYRINGE

(INFUSION)

- Smooth & Effortless Plunger Action: Designed with precision to ensure smooth plunger movement, reducing hand strain and allowing for accurate dosage control.
- Clear, Easy-to-Read Markings: Bold, precise graduation markings enable quick, accurate measurement of medication for dependable dosing.
- Secure, Leak-Proof Connection: Luer lock and slip-tip options provide a secure fit with needles, preventing accidental leaks or disconnection during use.

THORACIC DRAINAGE CATHETER

(SURGERY)

PRODUCT NAME: Thoracic Drainage Catheters

GENERIC: Thoracic Drainage Catheters

PRODUCT CATEGORY: Surgery

OPTIONS AVAILABLE : With Trocar & without Trocar

Thoracic Drainage Catheter is designed for effective drainage of air, blood, pus, or other fluids from the pleural cavity and thoracic region. Manufactured from medical-grade non-toxic PVC, the catheter ensures optimal flexibility, patient comfort, and reliable performance during thoracic procedures.

DRAINAGE CATHETERS

- Thoracic drainage catheters are most suitable for post operative drainage following cardio-thoracic surgeries.
- Distal end is open with super smooth large eyes to maximise the drainage from the chest.
- Proximal end is fitted with specially designed tapered tongue to provide excellent forceps grip and nontraumatic insertion.
- Catheters are marked at every 2 cm. from the last eye to ascertain the depth of placement.
- Packed with matching size spare connector which facilitates easy connection to drainage system.
- Sterile, ready for use.

FEATURES:

- Made from non-toxic, DEHP Free, medical-grade PVC.
- Smooth, rounded distal end with multiple drainage eyes for efficient drainage.
- Radio-opaque line throughout the length for X-ray visualization.
- Proximal end fitted with a universal funnel connector for secure attachment.
- Markings at every 2 cm for accurate depth placement.
- Sterile and ready to use.

PACKAGING:

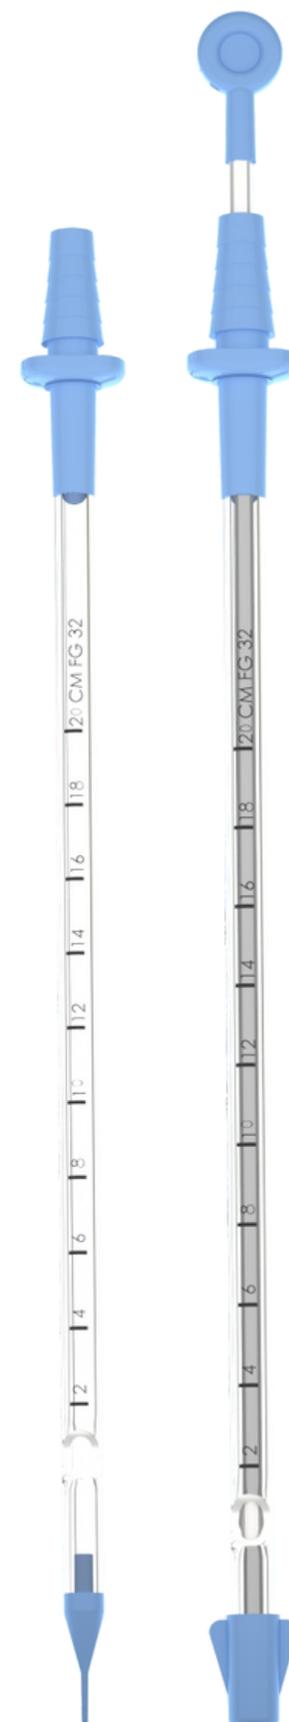

- Individually packed in sterile, peelable pouches.
- Available in both pediatric and adult sizes.

STERILIZATION:

- Ethylene Oxide (ETO) sterilized.

REGULATORY COMPLIANCE:

- CE Marked / ISO Certified
- Conforms to international quality standards (ISO-13485 2016).

	Ref. Code	Size(Fr)	Outer Diameter (mm)	Length	Typical Use	Quantity
	THCS-1	08 FR	4.0mm	28-30cm	Pediatric / Small drainage	60

	THCS-13	36 FR	12.0mm	36-40cm	Adult – massive hemothorax	60
	THCS-10	40 FR	13.3mm	36-40cm	Adult – large bore drainage	60

LUER CAP

(INFUSION ACCESSORIES)

OVERVIEW:

A reliable closure solution for vascular access devices, ensuring leak-proof sealing and protection of Luer connections against contamination.

FEATURES:

- Secure threaded design prevents accidental disconnection.
- Compliant with ISO 80369-7 for universal compatibility.
- Made from durable, sterilizable, chemical-resistant polymers such as HDPE (High Density Polyethylene).
- Minimal dead space to support accurate dosing and flushing.

APPLICATIONS / USES

- Provides a sterile closure for IV cannula hubs, central line ports, and extension sets
- Offers a leak-proof seal for syringe tips during procedures or sample transfer
- Secures the barrel of a syringe after medication admixture
- Protects catheter hubs from contamination after blood or fluid sampling
- Ensures safe storage and transport of pre-filled or partially filled syringes
- Temporarily closes open IV lines to prevent backflow or leakage

CERTIFICATIONS : CE

PACKING : Box of 250/Master box of 2500.

INJECTION STOPPER / HEPARIN CAP

FEATURES: Universal 6% Taper as per ISO-80369-7, Compatible with any standard product. • Latex / Isoprene plug leakage fitting for drawing of blood samples or intermittent injection of medicine. • Minimal Dead space. • Individually packed in a blister. • 6% Taper Face, • Latex / Isoprene. • Sterile / Non-Pyrogenic / Single-use. **OPTION AVAILABLE:** In a transparent body. **CERTIFICATION:** • CE **PACKING:** Box of 250/Master box of 2500.

COMBI LUER LOCK

PRODUCT - Combi Luer Lock is used as a closure device for male & female Luer's fitting. • The device is made as per ISO 80369-7 6% Taper Face.

ADVANTAGES :

- It can be used for Luer-Slip and Luer-Lock connections.
- Sterile & Non-Pyrogenic.
 - Available in Red, Blue & White Colour.
 - Combi Luer Lock can be used for Adult, Paediatric and Neonates.

CERTIFICATION: • CE

PACKING : Box of 250/Master box of 2500.
